## PROFESSIONAL SUMMARY

Dedicated Java Full Stack Developer with hands-on experience building and modernizing applications from monolith to microservices. Skilled in Java, Spring Boot, React, REST APIs, Docker, Jenkins CI/CD, and AWS. Strong focus on scalable backend systems, secure authentication, and cloud-native deployments.

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript, TypeScript

**Frameworks & Libraries:** Spring Boot, Spring MVC, Spring Security, React.js

**Databases:** MySQL, MongoDB

**Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, Jenkins, CI/CD

**Development Tools:** Git, Maven, JUnit, Mockito, REST APIs

## EDUCATION

**Bachelor of Technology (Information Technology)**

May 2024

CGPA: 7.22

## PROFESSIONAL EXPERIENCE

**Java Full Stack Trainee — Revature**

Oct 2025 – Jan 2026

- Developed enterprise-style full-stack applications using Java, Spring Boot, React.js, MySQL, and MongoDB.
- Designed REST APIs, authentication modules, and scalable backend services.
- Implemented microservices architecture using Spring Cloud and containerization with Docker.
- Built CI/CD pipelines using Jenkins and deployed applications on AWS EC2.
- Followed Agile Scrum practices including sprint planning, stand-ups, and iterative delivery.

## PROJECTS

**P0 – Social Media Application** Built a console-based social media application using JDBC with MySQL and MongoDB for hybrid relational-NoSQL data storage.

- Designed layered architecture (DAO, Service, Model) for modular and maintainable code.
- Implemented user registration, login, and password hashing.
- Developed CRUD operations for posts, comments, and likes using MongoDB.
- Integrated relational user data with NoSQL social content.

**Tech:** Java, JDBC, MySQL, MongoDB, Maven, JUnit, Git

**P1 – RevJobs Job Portal (Monolithic Full-Stack Platform)** Developed a full-stack job recruitment platform supporting employers, candidates, and admins with real-time communication and application tracking.

- Implemented JWT-based authentication and role-based authorization using Spring Security.
- Designed MySQL schema for users, jobs, companies, and applications.
- Built React frontend screens for login, registration, and profile management.
- Integrated REST APIs with frontend using Axios and implemented validations.
- Developed secure authentication flows and handled edge-case security scenarios.

**Tech:** Java, Spring Boot, Spring Security, React.js, MySQL, MongoDB, WebSockets, Maven, TypeScript, Git

**P2 – RevJobs Microservices Conversion & Cloud Migration** Migrated a monolithic job portal application into domain-driven microservices deployed on AWS with automated CI/CD and containerization.

- Implemented centralized API Gateway using Spring Cloud Gateway for routing, filtering, and load balancing.
- Configured service discovery and registration for microservices architecture.
- Designed and maintained Jenkins CI/CD pipelines for build, test, Docker image creation, and deployment.
- Managed Docker containerization and deployment workflows to AWS EC2.
- Coordinated blue-green and rolling deployment strategies ensuring zero-downtime releases.
- Performed end-to-end integration testing and monitored service health.

**Tech:** Java, Spring Boot, Microservices, Docker, Jenkins, AWS EC2, RDS, MySQL, MongoDB, React, TypeScript, Git
